

MOHAMMED ASAD

Aspiring Software Engineering Intern

 18-11-2005  +91 82475 79990  asadmohammed181105@gmail.com  linkedin.com/in/asad1811  Hyderabad

PROFESSIONAL SUMMARY

Penultimate-year B.Tech Computer Science student skilled in Python, Java, C, SQL, and Data Structures. Built real-world solutions in hackathons and academic projects with experience in machine learning and distributed systems. Seeking a software development internship to contribute to impactful, scalable engineering projects.

EDUCATION

2023 - Present	Bachelors Of Engineering (CSE) Sreenidhi Institute of Science and Technology
2021 - 2023	Intermediate (MPC) MS Junior College
2020 - 2021	SSC (Class - 10) MS Creative School

SKILLS

Programming Languages	- Python - SQL	- Java - Shell Scripting	- JavaScript - HTML	- C Language - CSS
CS Fundamentals	- Data Structures & Algorithms - Object Oriented Programming	- Data Science - Software Design	- Operating Systems - System Design	
Advanced	- Machine Learning - Natural Language Processing	- Information Retrieval - Vibe Coding		
Tools & Platforms	- Git - Github - Experience working with Unix/Linux environments	- VS Code - Rest API's	- Eclipse - Tensorflow	- Pytorch - SQL/NoSQL
Strengths	- Strong analytical and problem-solving skills - Ability to work collaboratively in teams - Passion for learning and building impactful software - Self-driven and eager to contribute to open-ended projects			

COMPETITIVE PROGRAMMING

- Solved 80+ problems on MentorPick - Active Leetcode problem solver	MentorPick LeetCode
--	--

CERTIFICATIONS

- Joy of Computing using Python – NPTEL - Fundamentals of Artificial Intelligence & Machine Learning – IIIT Hyderabad - Drone and Robotics Bootcamp - Vibe Coding	Certificate Certificate Certificate Certificate
---	--

PROJECTS

- **Automatic Number Plate Detection using OpenCV – 2025**
 - Addressed the challenge of automated vehicle number identification by developing a real-time detection system using OpenCV and image preprocessing techniques.
 - Engineered a complete OCR pipeline with Tesseract to segment and extract alphanumeric characters from localized plates, improving recognition in noisy and low-light conditions.
 - Delivered over 90% text extraction accuracy, showcasing skills in computer vision, optical character recognition, and scalable software development.

Project Link
- **AI-Powered Call Center Assistant – Python, Flask, Speech API, LLM’s – 2025**
 - Solved the need for automating customer support interactions by developing an AI-powered call center assistant using Python, Flask, and Google Speech-to-Text API.
 - Built a voice-enabled backend system capable of converting real-time speech to text, processing queries, and delivering dynamic responses via natural language logic.
 - Enhanced support efficiency and reduced response time, demonstrating practical skills in natural language processing, speech recognition, and cloud-based APIs.

Project Link
- **Object Detection Using Yolov8 - 2025**
 - Built an AI-powered object detection system using YOLOv8 and ONNX in Python for real-time image and video analysis.
 - Optimized and deployed the model to accurately detect and classify multiple objects with high performance.
 - Demonstrated skills in computer vision, deep learning, and model deployment within a Python-based development environment.
- **Website for the Hyderabads only Mental wellbeing event**
 - Developed and launched a dedicated website for FEEL, Telangana’s largest mental wellness event, using modern web technologies to promote mental health awareness and community engagement.
 - Designed an intuitive and responsive platform featuring event information, speaker showcases, registration workflows, partner/stall highlights, and wellness-focused user experiences.
 - Enhanced event outreach and accessibility by creating a centralized digital presence that streamlined participant registration and increased engagement for a large-scale mental health initiative hosted in Hyderabad.

Project Link

PARTICIPATION

Feb 2025	AI Hack Day SNIST - Participant AI Diagnostic Tool for Medical Reports & X-rays
Oct 2024	Innovasia Hackathon - Participant AI-Based Call Service Center & Chatbot
Apr 2024	TechXellerate Hackathon, BITS Pilani - Participant Medical Image Annotation Platform for MRI Data
Mar 2024	Smart India Hackathon – National Finalist Geolocation-Based Attendance Tracker Construction Progress Calculator
